

Climate Change Assignment: Due TUESDAY FEB 26 (The Day AFTER your 1st test)

- Choose one of the “Possible Facts” from the slides to research.
- You will write a reasonably short essay (no more than 5 pages, probably more like 2) concerning the “truth” and provide evidence for and against it. By evidence, I mean from papers, you are welcome to show figures from them as long as they are referenced.
- In the essay, you should address the following:
 - Look up at least 3 recent papers concerning the topic and discuss what the authors state as fact or possible.
 - Has scientific opinion changed on the topic? Did you find an older paper that discusses this “fact”?
- You should be prepared to lead a 5-7 minute talk/discussion to the class about what you found. Although short and informal, you should bring 2-3 slides with data taken from the papers or summarizing your sources to use as you make your point.
